

### **McKay Healthcare receives SIP and Paul Lauzier grants for emergency generator project**

**Soap Lake, June 17, 2022-** McKay Healthcare was awarded a Strategic Infrastructure Program (SIP) grant from Grant County for \$500,000 and a Paul Lauzier Foundation grant for \$125,000 to complete the replacement of the emergency generator, upgrade the electrical system, and for the removal of the existing boilers installed in 1942 that are no longer in use. These improvements will provide a new automatic emergency standby power source and bring the electrical systems up to code. These improvements will allow McKay to begin their modernization and expansion projects on their current campus.

McKay Healthcare & Rehabilitation Center is located in Soap Lake and offers their residents a continuum of care including professional nursing care, rehabilitative therapy and support services. They serve 42 residents for both short and long-term needs. We consider it our delight and honor to care for our community members in this rural setting, where it is “Our Family Caring for Yours”.

For more information about McKay, please visit our website at [www.mckayhealthcare.org](http://www.mckayhealthcare.org) or follow them on Facebook at McKay Healthcare and Rehab.
